

DINESH BIRLANGI

+91 9182729961 | dineshbirlangi0@gmail.com | linkedin.com/in/birlangi-dinesh | github.com/mr-Dinesh-pro

Professional Summary

Passionate AI enthusiast with hands-on experience in building machine learning and NLP solutions using Python and SQL. Skilled in developing data-driven applications, model optimization, and leveraging Generative AI concepts for real-world impact.

Education

B.Tech in CSE (Data Science)	2022 – 2026
Dadi Institute of Engineering & Technology	CGPA: 8.24
Intermediate (MPC)	2022
Ravindra Bharathi Junior College	77.5%
SSC	2020
St. Francis De Sales High School	100%

Technical Skills

Languages: Python, SQL, JavaScript

Web Technologies: HTML, CSS, React.js

Tools & Platforms: Git, GitHub, MS Excel, MS Word, MS Power point, VS Code, Canva, AWS

Core Concepts: DSA, OOPs, DBMS, Machine Learning, Regression, SVM, Statistics, LLM & RAG Basics, Prompt Engineering, Generative AI

Projects

Suicidal Intention Detection using NLP (*Python, Machine Learning, React, Vite*) 2026

- Developed an AI-assisted mental health monitoring system to identify high-risk suicidal text patterns using bert based models
- Built dynamic psychological assessment workflows with WhatsApp alerts and doctor recommendations.
- Led development and contributed to ML model training and application deployment and validated the system with over 120+ participants
- achieved 94% precision and 92% accuracy

Hitesh Divine Products Shop (*HTML, CSS, JavaScript, React.js*) 2026

- Developed an interactive e-commerce application for selling Karungalu malas, bracelets, and other divine products.
- Added and managed **30+ products** with dynamic rendering using structured JSON data.
- Designed a **3D animated UI with seamless transitions** to enhance user experience and engagement.
- Ensured responsive design and smooth user flow across all sections of the application. got 4.5 star rating for the product
- <https://mr-dinesh-pro.github.io/HITESH-DEVINE-PRODDUCTS-SHOP/>

Heart Disease Prediction System (*Python, Pandas, NumPy, Seaborn, Matplotlib, Scikit-learn, Google Colab*) 2026

- Processed and cleaned **20,000+ medical records** with **15+ features**, handling missing values and improving data quality by **30%**.
- Performed EDA with **10+ visualizations**, identifying key indicators (age, cholesterol, chest pain) influencing heart disease risk by **25%+**.
- Executed the complete pipeline on **Google Colab**, reducing development time by **40%** and ensuring efficient experimentation.

Internship experience

Generative AI Engineer Trainee — Data Pro Pvt. Ltd. Jun 2025 – Aug 2025

- Worked on Generative AI model development, deployment, and ML workflows using Google Colab.

AI/ML & Data Science Trainee — Data Valley.ai Jun 2024 – Aug 2024

- Worked on machine learning implementation, preprocessing, visualization, and model training.

Certifications & Achievements

- AI/ML Training – Samsung Innovation Campus & ESCII
- MongoDB Certification – IBM (edX)
- Data Analytics – LinkedIn Learning
- Deloitte Data Analytics Job Simulation – Forage
- Tata Data Visualization Job Simulation – Forage
- Semi Finalist – Amaravati Quantum Valley Hackathon
- Participated in ACM Interstate, DIET, and JNTUGV Hackathons
- ACM Professional Body Member and conducted Git & GitHub Workshop

Declaration

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
